Introduction

RegAlign AI is an asset-based compliance mapping tool for Saudi regulations. it turns an asset’s details into clear NCA and SAMA control guidance.
reducing manual searching and improving consistency.

Problem Statement

Saudi GRC teams manually map assets to NCA/SAMA controls, interpret requirements, and identify evidence, a slow, inconsistent process that becomes harder across multiple frameworks.
Organizations need a faster, standardized way to link assets to relevant controls and produce actionable compliance guidance.

Why It Matters

- Audit failure risk
- Financial penalties
- Reputation damage
- Inefficient manual processes

Solution Overview

RegAlign AI acts as a smart assistant to streamline Saudi regulatory compliance through automation and efficiency

Core Features

Key functionalities of RegAlign AI

Framework Support

RegAlign AI seamlessly integrates various frameworks, including NCA, SAMA

Asset-Based Mapping

The system provides tailored compliance mapping based on individual assets

AI Chatbot

Offers instant explanations and support

Core Features

Key functionalities of RegAlign AI

Control Recommendations

offers intelligent control recommendations, guiding users through the implementation process

PDF Export

Simplifies report generation for audits

Audit Checklist

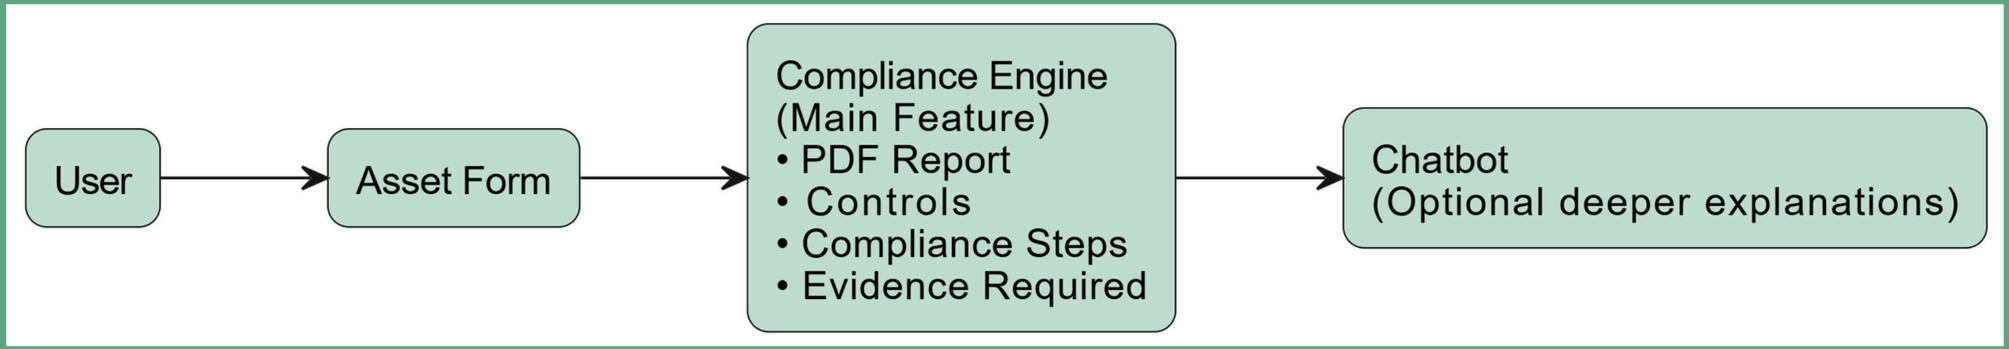
Suggests proof required for assessment and certification

RAG Intelligence

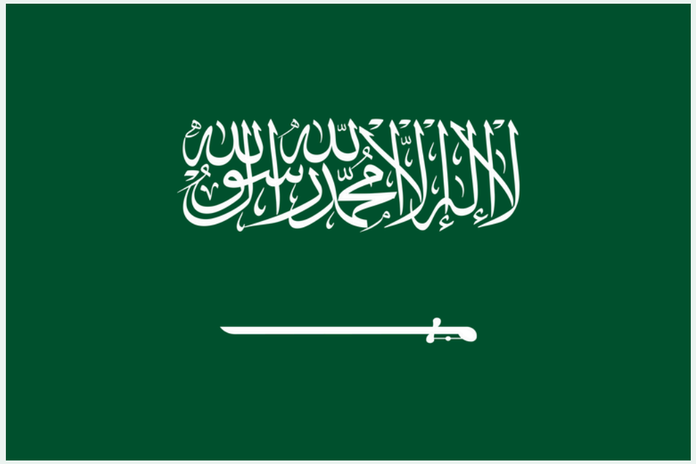
Our AI uses Retrieval-Augmented Generation (RAG) to ingest regulatory frameworks, retrieve the most relevant official text, and explain complex requirements in clear, simple language

his process prevents the AI from guessing; it grounds its responses in real regulation content and reasons from verified sources to deliver accurate, trustworthy guidance

System Architecture



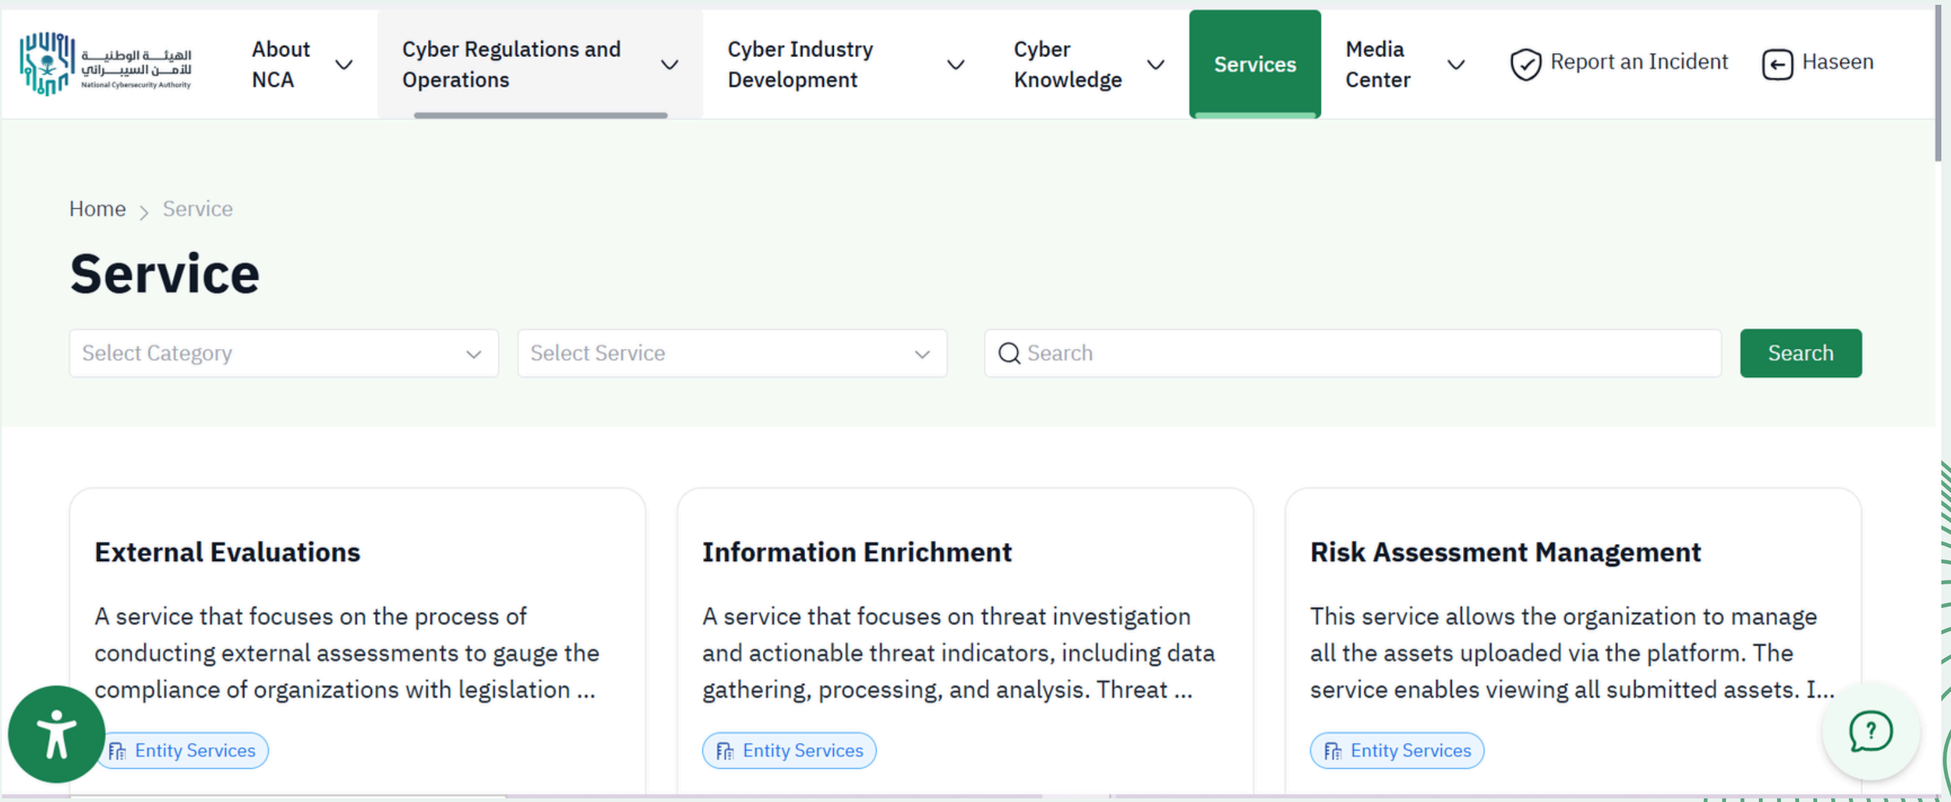
Brand Identity & UI



005430	006C35	2F895B	5DA580	8CC2A6	BCDCCB
Emerald Depths	Dark Emerald	Sea Green	Seaweed	Muted Teal	Ash Grey

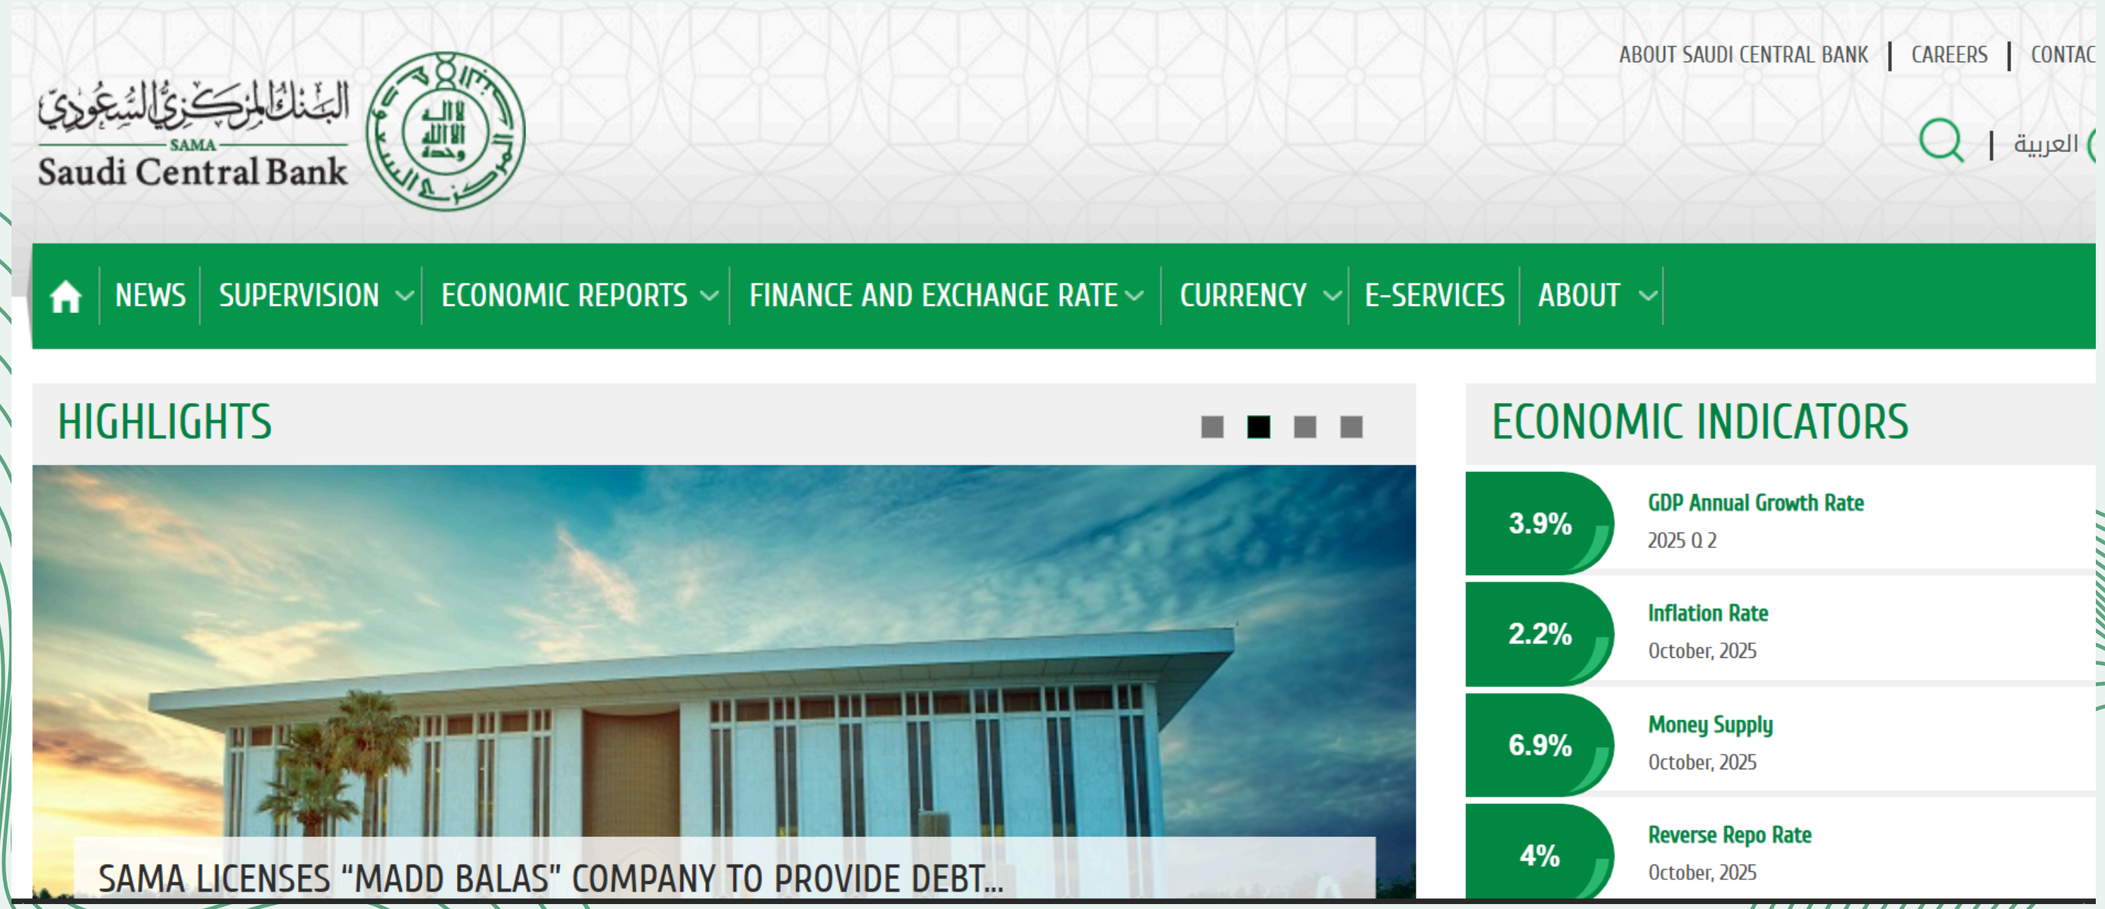
Brand Identity & UI

NCA user interface and brand identity



Brand Identity & UI

SAMA user interface and brand identity



Brand Identity & UI

A compass-inspired star symbolizing guidance and precise alignment with regulations for confident compliance.

REGALIGN AI

Benefits & Impact

Speed Test

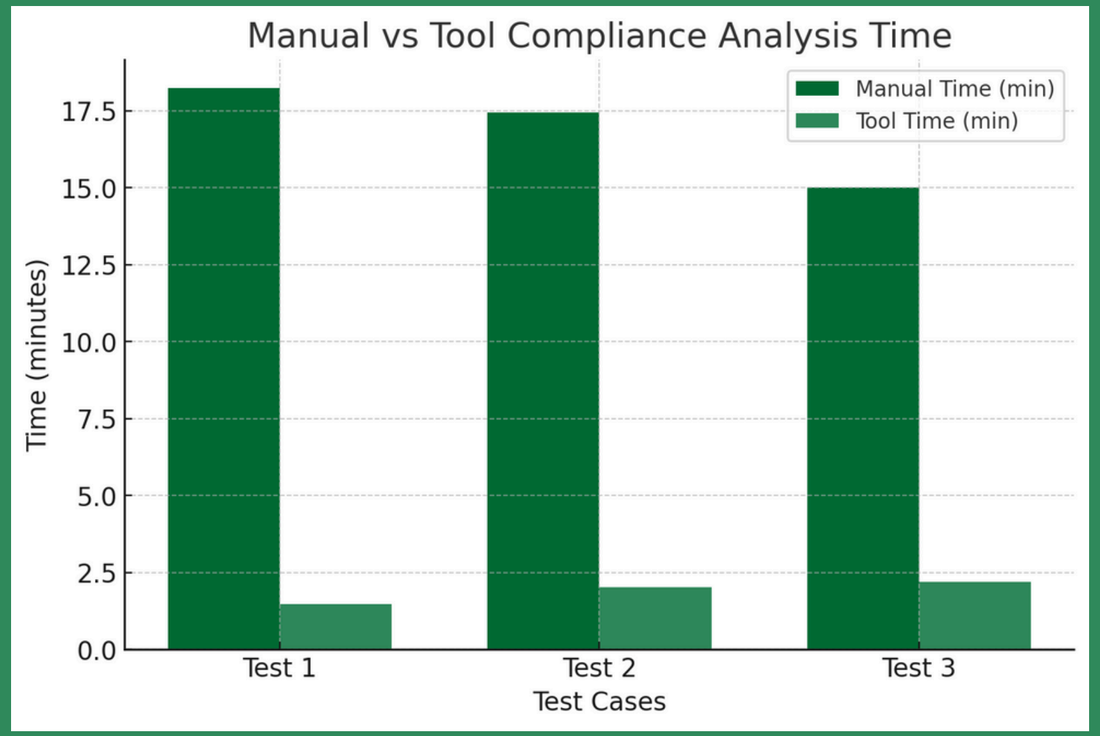
Attempt	Manual Time	AI Tool Time	AI Tool Time
Use case 1	18.24 min	1.47 min	91.94%
Use case 2	17.43 min	2.02 min	88.40%
Use case 3	15. min	2.19 min	85.93%

Accuracy Test

Attempt	Manually identified Controls	AI tool Identified Controls	Accurate Manually Identified	Manual method accuracy
Use case 1	12	10	2	16.67%
Use case 2	6	7	1	14.29%
Use case 3	7	9	1	11.11%

Benefits & Impact

- Our AI tool is faster, delivering ~89% speed improvement (15—18 min → ~2 min)
- Accuracy: 14% manual, +86% expected AI improvement
- Impact: faster compliance mapping, reduced manual searching.



Demo Flow

Enter Asset

User inputs asset details into the system.

Compliance Processing

The engine analyzes inputs and identifies controls.

Chatbot Assistance

AI chatbot clarifies any questions during the process.

Export Report

Final report is exported as PDF for use.

Conclusion

- RegAlign AI makes NCA/SAMA compliance mapping feel much easier by turning asset details into clear, regulation-grounded guidance.
- It helps teams move faster than the traditional manual search-and-interpret approach.
- Based on our evaluation approach, it’s expected to be more accurate and reduce missed or incorrect controls.
- It supports more consistent decisions and helps teams get audit-ready with less effort.
